of Mental Health**

Preparing Hospitals and Clinics for the Psychological Consequences of a Terrorist Incident or Other Public Health Emergency

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.1

What DO We Mean by Psychological Consequences?

- Emotional
- Behavioral
- Cognitive

Reactions that affect hospital and clinic staff,
patients, family members, and concerned
community members in the face of a disaster

Institute of Medicine (2003).

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.2

Purpose of This Course

To give you protocols, templates, manuals, and tools so that you can train staff at your health care facility to address the psychological consequences of terrorism or other public health events

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.3

Course Objectives

- Recognize the triggers of psychological distress
- Raise awareness of the types of psychological effects to expect
- Provide principles and tools to bring back to your facility to augment your response plan and strengthen resources
- Help train staff at your facility:
 - Increase their knowledge and ability to plan and respond to the psychological consequences of large-scale emergencies

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

Roadmap of an Emergency: SARS

Roadmap of an Emergency: SARS

Roadmap of an Emergency: SARS

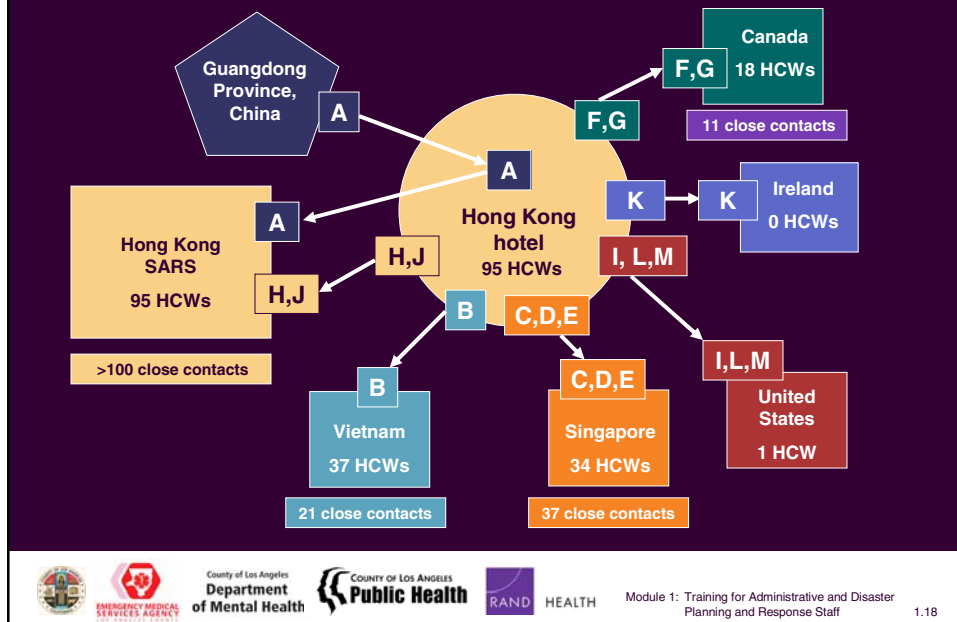

Roadmap of an Emergency: SARS

SARS: Effects on HCWs

- In the first month in Toronto, more than half of the quarantined patients in one hospital were HCWs
- Fears and infection control procedures led to isolation and stigmatization of HCWs
- Rates of psychological distress were high
 - 10–30% of quarantined persons developed psychological distress, including symptoms of depression or PTSD
 - 30% of HCWs reported job burnout one year later

1.25

*Terrorist
incident or
public health
emergency*

*Triggers of
psychological
effects*

- Restricted movement
- Limited resources
- Trauma exposure
- Limited information
- Perceived personal or family risk

*Short-term and
longer-term
effects*

- Emotional
- Behavioral
- Cognitive

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.26

Restricted Movement

- **Definition:** Limitations on movement or interactions with others

- Isolation
- Shelter in place
- Decontamination
- Quarantine
- Increased social distance
- Evacuation

- **Potential reactions**

- Loneliness
- Anger and fear
- Maladaptive behavior

- **Example:** A woman hospitalized with a severe respiratory problem is placed in isolation. She has no contact with her two young children or spouse and little access to social stimulation or personal relationships. Her family is quarantined at home, isolating them as well. Becoming agitated, she insists on leaving isolation to be with her family.

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.27

Limited Resources

- **Definition:** Access to resources is, or can be perceived as, restricted

- Clinics closed and supplies limited
- Resource distribution is seen as inequitable

- **Potential reactions**

- Anger
- Feelings of being stigmatized
- Agitation and hostility

- **Example:** Hospital staff are potentially contaminated while responding to an RDD event because there isn't enough personal protective equipment. Staff become anxious about working with exposed patients; some refuse to work in the decontamination zones. Some staff try to steal protective equipment to use as a precaution when they travel home.

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.28

Trauma Exposure

- **Definition:** Witnessing or being the survivor of a traumatic event

- Gruesome images of the injured or ill, especially children
- Severe injury or death

- **Potential reactions:**

- Grief
- Anger
- Worry
- Burnout (psychological distress from adverse work conditions)

- **Example:** During the response to an RDD, the hospital emergency department receives multiple survivors, including many school children from the explosion site. Patients, their loved ones, and staff are exposed to gruesome images of burn/blast survivors.

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.29

Limited Information

- **Definition:** Actual or perceived lack of appropriate information about risks, symptoms, and recommended actions

- Communication is inefficient or insufficient
- Information is conflicting or lacking

- **Potential reactions:**

- Fear
- Anxiety
- Frustration
- Anger/hostility

- **Example:** During a chemical attack, people lack information about what to do. They begin calling the hospital for additional guidance; some go to the ED demanding to be evaluated. Officials and the media give the public differing information about risk zones, increasing the confusion

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.30

Perceived Personal or Family Risk

- **Definition:** Concern about personal or family safety

- Exposure to harmful agents
- Illness, injury, death

- **Potential reactions:**

- Fear
- Inappropriate precautions
- Demand for medical care

- **Example:** During a pandemic influenza emergency, half of the hospital nursing staff are unable or unwilling to work because they either have no child care arrangements (schools and day-care centers are closed) or they are worried that they will be exposed to the disease and in turn expose their families

County of Los Angeles
Department

1.32

Areas Likely to Trigger Psychological Reactions

- Where people **enter and exit** the facility
- Where survivors are **treated**
- Where people **congregate**
- Examples:
 - Emergency department
 - Entrance, front desk
 - Waiting room, discharge area
 - Triage areas
 - Television viewing areas
 - Treatment areas

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.33

Where Do I Locate Everyone?

In advance of a disaster, determine where to locate:

- Psychological support
 - Fire and police may want their own MH team to administer care in a separate area
 - If necessary, use the parking lot or ancillary hospital/clinic building
- Waiting families and friends
 - Try to not mix families of the deceased with other families
- The bereaved
- Disruptive persons and assist people who become violent

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.34

What to Consider in Selecting Waiting Areas and Locations for MH Care

- Don't use the emergency department or intensive care unit halls
- Consider parking lots, auditoriums, cafeterias, and adjacent hospital buildings
- Choose
 - Spaces with easy access to bathrooms
 - Outdoor spaces that are viable in bad weather

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.35

Planning for Your Hospital MH Response Team

- Plan to be on your own for at least three days
- You will be limited to existing hospital/clinic staff
 - If available, MH clinical staff
 - Nonmental health clinical staff
 - Nonclinical staff (e.g., administrators and security staff)
- Pre-identify staff for your disaster MH team (and put them on your disaster planning committee)
- Identify the HICS MH Unit Leader and/or Employee Health and Well-Being Unit Leader

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.36

Plan for Additional Sources for MH Staff

- **Make pre-disaster agreements for mutual aid**
- **Disaster Resource Center including umbrella hospitals and clinics (pre-disaster)**
- **County Department of Health Services (post-disaster)**
 - DHS can access other county resources such as the Department of Mental Health, Public Health, etc.
 - DHS Emergency Medical Services Agency can contact the County Emergency Operations Center to access state and federal resources for postdisaster support
- **Establish partners (pre-disaster agreements)**
 - Volunteer organizations (social services)
 - Religious organizations (Chaplains)
 - Businesses (help with translation)
- **Volunteers**
 - Familiarize yourself with hospital/clinic plan for using volunteers
 - Develop list of approved groups

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.37

Suggestions for Using Mutual Aid Staff During Disasters

Reduce chaos and problems by determining:

- **How staff from mutual aid partners including volunteers will be processed upon arrival at your facility**
- **Who/where they will report to:**
 - HICS MH Unit Leader
 - Employee Health and Well-Being Unit Leader
 - Staging area or staff registration area
- **How to identify and badge outside staff working in your facility during disasters**

County of Los Angeles
Department
of Mental Health

HEALTH

Module 1: Training for Administrative and Disaster

Getting Additional Resources

L.A. County DMH is the lead agency for all disaster-related psychological services provided to the public

- Your hospital incident commander (or other disaster coordinator) can request DMH services through the County DHS EMS Agency Emergency Operations Center by contacting:

- Medical Alert Center (**MAC**): (323) 722-8073

- Disaster Operations Center (**DOC**): (323) 890-7601

- Hospital Emergency Administrative Radio (**HEAR**)

- Web-based hospital messaging system: **ReddiNet**

- To access L.A. County DMH crisis counseling and long-term MH care resources, call:

24-Hour Hotline: (800) 854-7771

1.42

Radiological Dispersal Device (RDD)

A dirty bomb containing cesium is detonated in downtown Los Angeles

- 180 deaths; ~270 injured; widespread contamination
- Hospitals inundated with ~50,000 people who believe they have been affected
- Patients, loved ones, and staff are exposed to gruesome images of burn/blast survivors
- Hospital and clinic staff may be contaminated because they lack protective gear
- Staff do not understand risks and are anxious and hesitant in their work
- Dozens of staff do not come to work
- ~ 20,000 individuals will probably be contaminated
 - Injured will require decontamination and treatment
 - Thousands more will probably need decontamination and medical follow-up

HEALTH

Module 1: Training for Administrative and Disaster
Planning and Response Staff

1.45

Pandemic Influenza

25 cases of a new, highly contagious strain of flu appears in a small village in south China. Over the next 4 months, outbreaks appear in Hong Kong, Singapore, South Korea, Japan, Los Angeles, and three other major U.S. cities. The CDC announces plans for allocating the limited supply of vaccine and provides guidelines for using scarce resources.

Health care providers are overwhelmed. Media attention highlights shortages of medical supplies, equipment, hospital beds, and HCWs. Those HCWs at work are worried about contaminating their families. In underserved areas, up to 25% of the nursing staff cannot come to work: They have no child care arrangements because schools and day care facilities are closed.

Hospital and clinic staff are torn between their roles as health care providers and parents. Some HCWs, especially those placed in home quarantine, become depressed; others, traumatized by working in hospital isolation units, develop PTSD.

1.50

Using the Recommended Actions Tool to Address RDD Decontamination

During the planning stage

- Train non-MH staff to help keep people calm and possibly also to identify MH trauma
- Prepare decontamination instruction signs in languages appropriate for residents of surrounding communities
- Think through privacy or modesty issues that may be cultural and plan to address them

During the decontamination process

- After individuals have been triaged and identified as exposed or not exposed, conduct MH assessments among both groups to identify those who need supportive care or MH intervention
- Try not to separate parents and children during the decontamination process
- Place MH staff in the “clean” zone to assess for trauma

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.5

Integrating MH into the Disaster Response

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
 - Functions for MH staff: Identifying “psychological hot spots”
 - Psychological reactions to large-scale disasters
 - Evidence-informed practices for early intervention: Recommendations for use
 - Psychological First Aid: How does it work?
 - Special populations: Their unique needs
 - Principles of self-care for HCWs: Preventing burnout
 - Materials for patients: Guidelines for use
 - Final thoughts

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.6

MH Is a Lonely Silo

- MH expertise is often underutilized
- Clinical staff believe they can handle patient MH problems on their own
- Many facilities have limited MH staff and cannot handle a “surge” situation

Clinical staff may lack the training needed to address the psychological consequences of terrorism or other large-scale emergencies

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.7

MH and Medical Care Should Complement Each Other

- Have a plan for bringing more MH staff to the situation
- Consider emergency department priorities
- The model for a large-scale disaster is different from the usual style used to counsel MH problems

Having MH staff appropriately trained to address psychological reactions can make the jobs of medical staff easier

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.8

Functions for MH Staff

- Integrating MH into the response: Addressing cultural barriers and structural obstacles

- Functions for MH staff: Identifying “psychological hot spots”
- Psychological reactions to large-scale disasters
- Evidence-informed practices for early intervention: Recommendations for use
- Psychological First Aid: How does it work?
- Special populations: Their unique needs
- Principles of self-care for HCWs: Preventing burnout
- Materials for patients: Guidelines for use
- Final thoughts

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.9

Functions for MH Staff

Where are the areas of greatest MH need?

What functions should be performed by MH staff?

What functions could be performed by other staff?

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.10

Areas Likely to Trigger Psychological Reactions

- Where people **enter and exit** the facility
- Where survivors are **treated**
- Where people **congregate**
- Examples:
 - Emergency department
 - Entrance, front desk
 - Waiting room, discharge area
 - Triage areas
 - Television viewing areas
 - Treatment areas

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.11

Other Areas Vulnerable to Triggers

- Decontamination or isolation areas
- All hospital departments/floors
- Pharmacy or other points of distribution
- Public information/public relations briefing areas
- Hospital or clinic incident command post
- Hospital or clinic telephones
- Staff locker rooms, cafeteria, or wherever staff may go to unwind or take breaks

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.12

Meeting Needs in Vulnerable Locations: Planning for Staff Placement

In advance of a disaster:

- Pre-identify your facility MH disaster response team
- Determine your areas of need for psychological support
- Determine which locations you want your MH staff to respond to and which other staff (“mental health auxiliary team”) could respond to
- Formalize relationships with internal non-MH staff to perform MH functions (e.g., administer PFA)

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.13

Issues to Consider in Placing MH Staff

- Where to provide MH care
 - Firefighters/police may prefer care in a separate area
 - Use parking lots or ancillary buildings
- Where to place
 - Waiting family and friends
 - The bereaved
 - Disruptive persons
- Avoid areas near the ER or intensive care unit
- Choose spaces with easy access to bathrooms and protection from weather

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.14

What Will MH Staff Do?

- Offer family assistance
- “Walk the line”
- Identify potential disrupters
- Conduct rapid MH assessments to identify urgent MH needs and provide psychological support
- Assess those identified as having nonurgent MH need and provide psychological support
- Provide care that includes early intervention techniques (to be discussed later)
- Perform other functions: See Hospital Incident Command System (HICS) functions and Recommended Actions tool

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.15

HICS Functions for HICS MH Unit Leader

Job Action Sheet		OPERATIONS SECTION Medical Care Branch	
MENTAL HEALTH UNIT LEADER			
Mission: Address issues related to mental health emergency response, manage the mental health care area, and coordinate mental health response activities.			
Date: _____	Start: _____	End: _____	Position Assigned to: _____ Initial: _____
Position Reports to: Medical Care Branch Director		Signature: _____	
Hospital Command Center (HCC) Location: _____		Telephone: _____	
Fax: _____		Other Contact Info: _____ Radio Title: _____	
Immediate (Operational Period 0-2 Hours)		Time	Initial
Receive appointment, briefing, and appropriate forms and materials from the Medical Care Branch Director.			
Read this entire Job Action Sheet and review incident management team chart (HICS Form 207). Put on position identification.			
Notify your usual supervisor of your HICS assignment.			
Document all key activities, actions, and decisions in an Operational Log (HICS Form 214) on a continual basis.			
Appoint Mental Health team members and complete the Branch Assignment List (HICS Form 204).			
Brief Unit team members on current situation, incident objectives and strategy; outline Unit action plan and designate time for next briefing.			
Meet with the Command staff and Employee Health & Well-Being Unit Leader to plan, project, and coordinate mental health care needs of patients, their family, and staff. The plan should include addressing the mental health needs of people who arrive at the hospital with concerns that they are or may be victims of the disaster.			
Participate in briefings and meetings, as requested.			

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.16

HICS Job Actions for HICS MH Unit Leaders

- Provide MH guidance and PFA on potential triggers of psychological effects
- Communicate and coordinate with “logistics section chief” to determine available staff to provide psychological support
- Access the supply of psychotropic medications in the facility
- Participate in developing a plan for communicating about risk and about addressing MH issues
- Observe patients, staff, and volunteers for signs of stress

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.17

Walk, Talk, Work

Practice mental health by
walking around

Provide informal staff
support and reassurance

Be present throughout the
incident

SOURCE: Maunder et al., 2003.

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.18

MH Support Functions for Non-MH Staff

- If trained, non-MH staff can:
 - Provide PFA
 - Refer staff and patients for MH follow-up, if needed, by assessing those directly affected by the disaster
 - Visit newly admitted patients to assess the need for MH staff
 - Pass out brochures outlining potential coping strategies
 - Staff support phone/computer hotline
- Untrained staff can update the staff information board

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.19

Psychological Reactions to Large-Scale Disasters

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
- Functions for MH staff: Identifying “psychological hot spots”
- ➔ • Psychological reactions to large-scale disasters
- Evidence-informed practices for early intervention: Recommendations for use
- Psychological First Aid: How does it work?
- Special populations: Their unique needs
- Principles of self-care for HCWs: Preventing burnout
- Materials for patients: Guidelines for use
- Final thoughts

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.20

Psychological Reactions

- Emotional distress
- Behavioral responses
- Cognitive effects
- Somatic reactions
- Diagnosable psychiatric illness

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.21

Emotional Reactions

- Fear, anxiety, “terror”
- Grief
- Sadness, depression
- Disbelief, numbness
- Anger, rage, resentment
- Hopelessness, despair
- Guilt
- Helplessness, loss of control

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.22

Behavioral Responses in Adults

- Agitation
- Aggressiveness
- Social or emotional withdrawal and, in turn, changes in relationships
- Heroic behaviors
- Helplessness versus control
- Risk taking or self-medication
 - Smoking
 - Drinking/recreational drugs

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.23

Behavioral Responses in Children

- Clingy behaviors
- Aggression or disruption
- Defiance or belligerence
- Hyperactivity (as a presentation of anxiety)
- Withdrawal or avoidance
- Regressive behaviors
- Refusal to attend school or day care
- Relationship changes—difficulty getting along with siblings or parents
- Risk taking (drugs or alcohol—teens)
- Reenacting events (through play)
- Self-blame

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.24

Cognitive Effects

- Difficulty concentrating, remembering, or making decisions
- Repeated thoughts or memories
- Recurring dreams or nightmares
- A sense of vulnerability—or invulnerability
- A distorted sense of reality
- Confusion
- Altruism
- Apathy or loss of interest
- Loss of faith

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.25

Somatic Reactions

- Increased heart rate or palpitations
- Sweating
- Nausea or vomiting
- Physical weakness
- Difficulty breathing
- Increased startle reflex
- Stomach irritability
- Fatigue
- Changes in appetite
- Headaches
- Responses involving these reactions are often referred to as
 - Multiple unexplained physical symptoms (Diamond, Pastor, and McIntosh, 2004)
 - Disaster somatization reactions (Engel, 2004)
- Emotional reactions of distress can be misinterpreted as symptoms of exposure to WMD

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.26

Diagnosable Psychiatric Illness

- Acute stress disorder (ASD)
 - Within 30 days of trauma
- Post-traumatic stress disorder (PTSD)
 - After 30 days post trauma
- Major depressive disorder
- Panic disorder
- Generalized anxiety disorder
- Adjustment disorder (especially with children)

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.27

Psychological Reactions: Summary

- Expect a range of emotional, cognitive, and behavioral reactions
- These are typical reactions to abnormal events
- Most reactions will resolve naturally with time
- Care must be taken to evaluate severity and functional impairment before diagnosing a disorder

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.28

Evidence-Informed Practices for Early Intervention

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
- Functions for MH staff: Identifying “psychological hot spots”
- Psychological reactions to large-scale disasters
- ➔ • Evidence-informed practices for early intervention: Recommendations for use
- Psychological First Aid: How does it work?
- Special populations: Their unique needs
- Principles of self-care for HCWs: Preventing burnout
- Materials for patients: Guidelines for use
- Final thoughts

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.29

Objectives of Early Interventions

- Provide crisis intervention
 - Provide appropriate triage and psychosocial support
- Reduce emotional and mental distress
 - For example, limit the displaying of video footage of the disaster, particularly in public places
- Improve problem solving and enhance positive coping skills
- Facilitate recovery
- Refer as needed to MH professionals
- Provide advocacy

SOURCE: National Institute of Mental Health, 2002.

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.30

What Evidence Suggests About Early Interventions

- Early, brief, and focused psychotherapeutic intervention can reduce distress
- Selected cognitive behavioral approaches may help reduce incidence, duration, and severity of ASD, PTSD, and depression
- Early interventions that focus on the recital of events **DO NOT** consistently reduce risks of PTSD or related adjustment difficulties

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.31

Key Reminders

- Presuming a clinically significant disorder in the early post-phase is inappropriate, except when there is a preexisting condition
- Those exposed should be offered psychoeducational support
- Debriefings should not be conducted for the primary purpose of preventing or reducing mental disorders

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.32

Recognize and Address Hierarchy of Needs

1. Survival
2. Safety
3. Security
4. Food
5. Shelter
6. Health (physical and mental)
7. Triage
8. Orientation
9. Communication with family, friends, and community
10. Other forms of psychological support

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.33

Key Steps in Early Intervention

- Assure basic needs
- Provide PFA
- Conduct needs assessment
- Triage individuals
- Provide treatment
- Foster resilience, coping, and recovery
- Monitor recovery environment
- Conduct outreach and disseminate information
- Pay attention to needs of special populations

Call the 24-hour hotline for assistance: (800) 854-7771

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.34

Follow-up Should Be Offered to Some Individuals

- Who have ASD or other clinically significant symptoms
- With complicated bereavement
- With preexisting psychiatric disorders with current symptoms
- Who require medical or surgical attention
- Who experienced particularly intense or particularly long exposure

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.35

Psychological First Aid

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
- Functions for MH staff: Identifying “psychological hot spots”
- Psychological reactions to large-scale disasters
- Evidence-informed practices for early intervention: Recommendations for use
- ➔ • Psychological First Aid: How does it work?
- Special populations: Their unique needs
- Principles of self-care for HCWs: Preventing burnout
- Materials for patients: Guidelines for use
- Final thoughts

Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.36

About PFA

- **Definition:** Evidence-informed modular approach to assist children, adolescents, adults, and families in the immediate aftermath of disaster and terrorism
- **Principal actions:**
 - Establish safety and security
 - Connect to restorative resources
 - Reduce stress-related reactions
 - Foster adaptive short-and long-term coping
 - Enhance natural resilience rather than preventing long-term pathology

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.37

PFA—for Whom? By Whom?

- For whom is PFA intended?
 - Children, adolescents, parents/caretakers, families, and adults exposed to disaster or terrorism
 - First responders and other disaster relief workers
- Who delivers PFA?
 - MH and other disaster response workers who provide early assistance to affected groups as part of an organized disaster response effort
 - Responders working in primary and emergency health care (i.e., hospitals and clinics)

SOURCE: NCTSN/NCPTSD (2006).

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.38

Strengths of PFA

- Includes basic information-gathering techniques to aid rapid assessments
- Relies on field-tested, evidence-informed strategies
- Emphasizes developmentally and culturally appropriate interventions for different ages and backgrounds
- Includes handouts providing information for different groups to use in recovery

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.39

Eight Core Components of PFA

1. Contact and engagement
2. Safety and comfort
3. Stabilization (if needed)
4. Information gathering: Current needs and concerns
5. Practical assistance
6. Connection with social support
7. Information on coping
8. Linkage with collaborative services

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.40

1. Contact and Engagement

Goal: Establish a human connection in a nonintrusive, compassionate manner

- Introduce yourself
- Ask for permission to talk
- Explain the objective

PFA provider: *"My name is _____. I am a mental health or _____ staff member here. I'm checking with people to see how they are feeling. Can we talk for a few minutes? May I ask your name?"*

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.41

2. Safety and Comfort

Goal: Enhance immediate and ongoing safety and provide physical and emotional comfort

- Provide information about disaster response activities/services at your facility
- Offer physical comforts
- Offer social comforts/links with other survivors
- Protect from additional trauma (including media viewing)

PFA provider: *"Do you need anything to drink or eat? Is your family here with you? Do you have a place to stay? We are providing _____ services. Do you have any questions I can answer now?"*

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.42

3. Stabilization (if needed)

Goal: Calm overwhelmed or distraught survivors

- Watch for signs of disorientation or overwhelming emotion
- Take steps to stabilize a distressed individual
 - Remain calm and provide opportunities to talk
 - Help people focus on tasks they need to complete right now
 - Suggest that the person take a few moments “time out” before deciding what to do next
 - Teach deep breathing
 - Focus on soothing things

PFA provider: *“You have been through a lot. It might help to take a few deep breaths right now. It is normal during a disaster to feel like you don’t know what to do. Can I help you with deciding what to do next?”*

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.43

4. Information Gathering

Goal: Identify immediate needs and concerns, gather information, and tailor PFA interventions

- Identify individuals who need immediate referral
- Identify need for additional services
- Identify those who might need a follow-up visit

PFA provider: *“Can you tell me where you were during the disaster? Were you injured? Do you have a place to live right now? Is your family safe? How are you (and your children) coping with what is happening? Is there anything else you’d like to talk about?”*

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.44

5. Practical Assistance

Goal: Offer survivors practical help to address immediate needs and concerns

- Identify the most immediate need(s)
- Discuss ways to respond
- Act to address the need

PFA provider: *"It seems like what you are most worried about right now is _____. Can I help you figure out how to deal with this?"*

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.45

6. Connection with Social Support

Goal: Help establish brief or ongoing contacts with primary support persons or with other sources of support such as friends and community resources

- Enhance access to primary support persons
- Encourage use of other support persons who are immediately available
- Optional: Discuss elements of support seeking
- Address extreme social isolation or withdrawal

PFA provider: *"Are there family members or friends who you can call right now who can help? Is there a community group (such as a church, etc.) that could help you? Have you contacted any of these sources of support to let them know what has happened?"*

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.46

Types of Social Support You Can Provide

- Emotional support
- Social connection
- Encouragement of value to others
- Reassurance of self-worth
- Reliable support
- Advice and information
- Physical assistance
- Material assistance

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.47

7. Information on Coping

Goal: Provide information about stress reactions and coping to reduce distress and promote adaptive functioning

- Provide basic information about common stress reactions
- Be sure to include common reactions for children and adolescents
- Provide information on ways of coping
- Include information on when to seek further MH services

PFA provider: *"After an experience like this, it's understandable for you (and your kids) to feel (confused, afraid). You will probably start to feel better soon. But if you don't, there are places to get help. There are people available 24 hours every day at 800-854-7771. That is the number for mental health services for L.A. County. Staff there are understanding and can help you work your way through this difficult time."*

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.48

8. Linkage with Collaborative Services

Goal: Link survivors with services available to them before the disaster

Provide direct referrals to additional services

- County mental health services or those through private insurance
- Medical services
- Red Cross and FEMA, as appropriate
- For children and adolescents (referrals require parental consent)
- For older adults
 - Primary care physician, local senior center, meals, senior housing/assisted living, transportation services

Addressing the MH Needs of Special Populations

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
- Functions for MH staff: Identifying “psychological hot spots”
- Psychological reactions to large-scale disasters
- Evidence-informed practices for early intervention: Recommendations for use
- Psychological First Aid: How does it work?
- ➔ • Special populations: Their unique needs
 - Principles of self-care for HCWs: Preventing burnout
 - Materials for patients: Guidelines for use
- Final thoughts

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.50

Special Populations

- Children
- The elderly
- People with physical and developmental disabilities
- The severely and persistently mentally ill (SMI)

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.51

*Terrorist
incident or
public health
emergency*

Smallpox

*Triggers of
psychological
effects*

- Restricted movement
- Limited resources
- Trauma exposure
- Limited information
- Perceived personal or family risk

*Short-term and
longer-term
effects*

- Emotional
- Behavioral
- Cognitive

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.52

Needs Resulting from Restricted Movement: Special Populations

- **Children** in isolation/quarantine should have access to
 - Parents or “Child Life” professionals or child care specialists
 - Games, books, etc.
- **The elderly** may need home visits for shelter-in-place situations
- **The physically disabled**
 - They will require access to their special equipment while in isolation or quarantine
 - Decontamination areas should accommodate wheelchairs
 - Use interpreters for the hard of hearing
 - Ask how you can be of assistance, e.g., for the blind

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.53

Needs Resulting from Restricted Movement Among Special Populations

- **The SMI** should have access to
 - MH staff while in isolation, decontamination, and quarantine
- **Children, the elderly, and the physically disabled** may require help during evacuations

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.54

Needs Resulting from Limited Resources: Special Populations

Limited resources: Access to resources is actually or perceived to be limited or restricted

- Children and the physically disabled—personal protective equipment may not fit
- The SMI may have reduced ability to cope with disruptions in care
- Children and the SMI may respond more strongly to triggers, so they may require more resources

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.55

Needs Resulting from Trauma Exposure: Special Populations

Trauma exposure: Witnessing or being the survivor of a traumatic event

- Children may:
 - Exhibit distress differently from adults
 - Be less able to understand concepts like death
 - Be less able to communicate about their trauma exposure
 - Have fewer positive coping skills
- Children and the SMI may respond strongly to triggers
- The elderly may:
 - Feel ashamed about discussing emotional reactions or receiving psychological services

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.56

Needs Resulting from Limited Information: Special Populations

Limited Information: Actual or perceived lack of information about risks, potential consequences, and what to do

- **Children**—Assign one consistent person to supervise and accompany these children
- **The elderly and the SMI**—May not understand the standard information provided; staff should be available to explain and supplement it
- **The physically disabled**—treat the same as anyone else. Accommodate for communication and access to services when needed.

Remember—Handouts for MH staff and for parents are available in this training binder

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.57

Needs Resulting from Perceived Risk: Special Populations

Perceived personal or family risk: Fear or concern about the safety and well-being of yourself or loved ones

- **Children:**
 - Children may be more fearful than others
 - Their parents will be concerned if they are separated from their children
- **The SMI**—their cognitive impairment could “mask” actual risk and fear

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.58

Culturally Relevant Services

Some cultural minorities may

- Not want to discuss their trauma with MH staff because they
 - Mistrust health authorities
 - Are ashamed of getting psychological care
- Want spiritual counseling particular to their culture
- Need more MH resources if they had prior experiences with major disasters in their country of origin
- Require translators in isolation, quarantine, and decontamination areas

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.59

Principles of Self-Care

- Integrating MH into the response: Addressing cultural barriers and structural obstacles
- Functions for MH staff: Identifying “psychological hot spots”
- Psychological reactions to large-scale disasters
- Evidence-informed practices for early intervention: Recommendations for use
- Psychological First Aid: How does it work?
- Special populations: Their unique needs
- ➡ • Principles of self-care for HCWs: Preventing burnout
- Materials for patients: Guidelines for use
- Final thoughts

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.60

What Is Burnout?

A form of psychological distress (not a diagnosis)

- The “persistent, negative, work-related state of mind . . . characterized by exhaustion, . . . accompanied by distress, a sense of reduced effectiveness, decreased motivation, and the development of dysfunctional attitudes and behaviors at work”*
- Develops gradually and may remain unnoticed for a long time

* Schaufeli and Buunk, 2003, p. 388.

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.61

Burnout Is an Imbalance Between Supply and Demand

Stressed and overburdened
at work and outside work

Perception that support
and resources at work
are inadequate

Prevalence rates during
SARS 10%–30%

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.62

What Generates Demand?

Changes in workload and overtime

Unfamiliar work

Greater conflict at work

Social isolation or stigmatization

SOURCE: Maunder et al., 2003 and 2006; Maunder, 2004.

and Non-Clinical Staff

2.63

What Might Increase Supply?

Training and education in infection control
procedures and use of PPE

Adequate supplies of PPE

Support for worker well-being ensuring
safety at the workplace

County of Los Angeles
Department
of Mental Health

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.64

Self-Care DOs and DON'Ts

- Recognize that disasters are extraordinary events, and that your emotional reactions are normal, universal, and expected
- Get adequate sleep, rest (take a break, take a walk), nutrition
- Use your social support network
- Exercise, listen to music, talk, meditate
- Limit viewing of events on television
- Seek help if reactions continue or worsen over time

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.65

Preventing and Reducing Stress: Tips for Supervisors

- Always **address practical concerns**:
 - Codify and revisit disaster procedures (infection control and PPE use)
 - Manage work-rest schedules
 - Avoid conscripting workers to high-risk situations against their wishes and without proper training and protection
 - Manage conflicts between staff
 - Assess and address staff perceptions of personal and family risk

County of Los Angeles
Department
of Mental Health

HEALTH

Module 2: Training for Clinical, Mental Health,
and Non-Clinical Staff

2.66

How Supervisors Can Maintain a Supportive Environment

- Provide tangible support for workers on duty and in quarantine
- Consider staff well-being in decisions
- Visibly, actively manage stress by roaming work areas
- Support and enforce principles of self-care: nutrition, sleep, exercise/activities, talking, music
- Provide a role model: hang out in the staff lounge
- Provide ready access to supportive MH resources during and after the event

Example 1: RDD

After completing triage, a young woman begins complaining of heart palpitations. She is visibly sweating and reports that she is going to vomit. She reports having witnessed lots of people die from the explosion.

The provider assesses the patient and rules out any acute medical needs.

What do you do?

- What are some potential triggers of a psychological reaction?
- What intervention(s) might you use?

Example 2: RDD

The Emergency Department waiting room is at capacity as the staff try to triage individuals for medical treatment.

Several individuals become very agitated and verbally aggressive toward staff because they are concerned that they are exposed.

What do you do?

- What are some potential triggers of a psychological reaction?
- What intervention(s) might you use?

3.2

Purpose of This Course

To teach you the skills necessary for providing MH services within the hospital and clinic setting in the immediate aftermath of an emergency and to implement a more sustained operation to support the psychological needs of patients, family members, staff, and first responders

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.3

Course Objectives

After completing this module, you will know how to

- Report to locations in hospitals and clinics where your expertise will be needed
- Work within the hospital and clinic “culture” to help survivors suffering from psychological effects during a large-scale disaster
- Respond to MH reactions over time
 - Using evidence-informed strategies to address psychological reactions
 - Addressing the needs of patients, family members, staff, and special populations

County of Los Angeles
Department
of Mental Health

Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.6

Organizational Culture and Cultural Competency

- ➔ • Organizational culture and cultural competency
 - Working effectively in hospitals and clinics
 - Going where you are needed most
 - Providing culturally competent services
- Disaster reactions and responses
- Special populations
- Interactive exercises and discussion

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.7

MH Care Is Different in a Disaster Situation

Traditional MH care

Disaster situation

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.8

In a Disaster Situation

DO

- Report to the DMH team leader
- Reassure people that you are doing all that you can to meet their needs as soon as possible
- Set a tone that is consistent, predictable, and calm
- Be mindful of delivering culturally competent services
- Refer media requests for interviews to the hospital PIO
- Provide assistance by walking around

DO NOT

- Answer any media questions
- Communicate issues and concerns to anyone other than the MH unit leader
- Use cell phones in medical treatment areas
- Attempt to conduct typical psychotherapy with a focus on processing the traumatic exposure
- Expect those who need assistance to come to your office

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.9

Basics of Providing an MH Response After a Disaster

- Understand the response structure
 - Leadership
 - Coordination of MH services
- Continually assess MH needs—the environment is very fluid
- Prevent duplication of effort

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.10

Challenges to Implementing a Psychological Intervention

- Many MH professionals have never delivered MH care in a health care facility or clinic after a large-scale disaster
- To provide effective psychological support in that setting, you need to understand two critical factors
 - Logistical concerns
 - Planning for response

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.11

MH Responders Will Face Unique Challenges

- Restrictions on movement will mean that survivors are treated on the premises
- Local staff may be inundated with offers of assistance, so you could be turned away
- Make sure you know how to reach the on-site coordinator for the MH response
- Law enforcement could override your assignment
- Be prepared for a stressful experience

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.12

What You Will Learn at the DMH Leader Briefing

- The terrorism event or other public health emergency that is involved
- When and where the event/emergency occurred
- Where and to whom to report
- Whether PPE is needed, where to get it, how to put it on

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.13

DMH Check-In Procedures

- Bring DMH ID and report to the county DMH team leader
- The facility MH unit leader (in coordination with the DMH team leader) will
 - Assign you to a location
 - Instruct you about precautions to take
 - Inform you of other organizations providing MH care
- The MH support you may be asked to provide may be different in each location

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

RAND HEALTH

Module 3: Training for County Disaster
Mental Health Staff 3.16

Where Might You Be Needed?

- The facility MH unit leader may send you to
 - Locations likely to have high levels of psychological need—e.g., ED, entrance, triage, decontamination/quarantine/isolation
 - Waiting rooms
 - The cafeteria (staff and patients)
- Each location will present unique response challenges

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.17

Using Alternative Sites for MH Care

- Sites could include
 - Auxiliary hospital buildings
 - Clinics
 - Parking structures
 - Auditoriums
- MH staff should look for areas to provide MH care privately

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.18

Ensuring Your Own Safety

- Practice universal precautions
- If the disaster involves a contagious disease, the facility's contagion control department will advise the HICS MH and DMH team leader about precautions
- Wear extra personal protective equipment (PPE), e.g., masks, gowns, etc., if asked to do so by hospital staff
- Speak to your DMH leader if you have additional concerns

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

Module 3: Training for County Disaster
Mental Health Staff

3.19

Some Cultural Barriers to MH Intervention

- Language
- Immigration status
- Literacy/education level
- Mistrust of government and law enforcement
- Varied perception of medical professionals
- Political climate

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

Module 3: Training for County Disaster
Mental Health Staff

3.20

Tailor Support and Intervention to the Cultural Needs of Specific Groups

- Be culturally sensitive
- Provide information and services in the appropriate language
- Collaborate and consult with trusted organizations and community leaders to serve the needs of the hospital or clinic community (in advance of a disaster)

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.21

People from Other Cultures May Be Uncomfortable with Western Medicine

- Survivors with serious injuries may bring families from different cultures into contact with Western medicine for the first time
- Contact is particularly challenging if English is not the family's primary language

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.22

Respond Sensitively and Specifically

- Many aspects of a disaster have cultural overlays
 - Death of a loved one
 - Community trauma
 - Mass victimization
- Rituals surrounding death are deeply rooted in culture and religion
 - Appropriate handling of physical remains
 - Funerals and burials
 - Memorials and belief in an afterlife

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

Module 3: Training for County Disaster
Mental Health Staff

3.23

Try to Communicate Cultural Sensitivity

- Use culturally accepted courteous behavior
 - Greetings, physical space, knowing who is considered “family”
- Describe your role in culturally relevant terms
- Take time to establish rapport
- Ask about cultural practices when uncertain
- Value diversity and respect differences
- Develop and adapt approaches and services to meet the needs of specific groups likely to seek care in your location

Public Health

Module 3: Training for County Disaster
Mental Health Staff

3.26

Possible Reactions to a Large-Scale Emergency

- Expect a range of reactions across multiple domains
 - Emotional
 - Behavioral
 - Cognitive
 - Physical
- For most individuals, the reactions will disappear over time; for some, the reactions may evolve or even worsen
- Early interventions can mitigate or shape these reactions in both the short and the longer term

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.27

Reactions: Some Examples

- **Physical:** agitation, hyperarousal, fatigue, gastrointestinal distress, appetite changes, alertness
- **Behavioral:** sleep changes, hypervigilance, avoidance, isolation, withdrawal
- **Emotional:** shock, disbelief, sadness, grief, irritability, anxiety, despair, guilt, feeling involved
- **Cognitive:** confusion, intrusive thoughts, recurring dreams, difficulty concentrating or making decisions, courage

Early Interventions

Overview of the range of short-term interventions

- Typical interventions that county DMH staff would use at a clinic or hospital after a disaster
- Some details about particular techniques

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.37

Objectives of Early Intervention

- Provide appropriate triage and psychosocial support
- Reduce emotional distress and mental stress
- Improve problem solving and enhance positive coping skills
- Facilitate recovery
- Refer, as needed, to MH professionals
- Provide advocacy

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.38

Key Considerations for Interventions

- Assume that “all who witness are affected”
- Avoid labeling
- Assume competence and capability
- Respect differences in coping
- Provide help that is practical and flexible
- Encourage use of existing support networks

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.39

Counseling Skills Following the Incident

- Establish rapport
- Attend to the conversation nonverbally
 - Allow silence
 - Make eye contact, nod head
 - Paraphrase
 - Reflect feelings
 - Allow expressions of emotions
- Facilitate problem solving
 - Identify and define the immediate problem
 - Assess functioning and coping
 - Evaluate available resources
 - Develop and implement an action plan

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.40

Early Intervention Techniques

- PFA
- Psychoeducation and reassurance
- Triage, assessment, and referral
- Anger management
- Acute crisis intervention and models
 - Critical incident stress management (CISM)
 - Cognitive behavioral techniques

County of Los Angeles
Department
of Mental Health

PFA Fact Sheet

FACT SHEET FOR PROVIDERS
COURAGE TO CARE
A HEALTH PROMOTION CAMPAIGN FROM
Uniformed Services University of the Health Sciences, your federal medical school, Bethesda, Maryland • www.usuhs.edu

PSYCHOLOGICAL FIRST AID
Helping Victims in the Immediate Aftermath of Disaster

As a healthcare provider, first responder, leader or manager of disaster operations, this fact sheet describes an evidence-based approach for helping victims cope in the immediate aftermath of a disaster known as Psychological First Aid, and explains how to administer it. Psychological First Aid aims to modify the painful range of emotions and physical responses experienced by people exposed to disaster. These reactions include combinations of confusion, fear, helplessness, helplessness, disorientation, physical pain, irritability, anger, grief, shock, apathy, numbness, guilt, shame, shaken religious faith, and loss of confidence in self or others. There is consensus among international disaster experts and researchers that Psychological First Aid can help decrease these painful emotions and reduce further harm that can result from initial reactions to disaster. Please share this fact sheet with your disaster outreach colleagues.

Do's and Don'ts for Promoting an Environment of Safety, Calm, Connectedness, Self-Efficacy and Hope
The primary objectives of Psychological First Aid is to create and sustain an environment of 1) safety, 2) calm, 3) connectedness to others, 4) self-efficacy or empowerment, and 5) hope.

DO:

- Promote Safety**
 - Help people meet basic needs for food, shelter, and obtain emergency medical attention.
 - Provide repeated, simple and accurate information on how to obtain help.
- Promote Calm**
 - Listen to people who wish to share their stories and emotions, and remember there is no wrong or right way to feel.
 - Be friendly and compassionate even if people are being difficult.
 - Offer accurate information about the disaster or trauma, and the relief efforts underway to help victims understand the situation.
- Promote Connectedness**
 - Help people connect friends or loved ones.
 - Keep families together: Keep children with parents or other close relatives whenever possible.

Promote Self-Efficacy

- Give practical suggestions that move people towards helping themselves.
- Engage people in meeting their own needs.

Promote Hope

- Find out the types and locations of government and non-government services and direct people to these services that are available.
- Remind people (if you know) that more help and services are on the way when they express fear or worry.

DON'T:

- Force people to share their stories with you, especially very personal details (this may decrease calmness in people who are not ready to share their experiences).
- Give simple reassurances like "everything will be OK" or "at least you survived" (statements like these tend to diminish calmness).
- Tell people what you think they should be feeling, thinking or doing now or how they should have acted earlier (this decreases self-efficacy).
- Tell people why you think they have suffered by blaming it on personal behaviors or beliefs of victims (this also decreases self-efficacy).

Continued on reverse side

County of Los Angeles

of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.44

Psychoeducation and Reassurance

- Provide basic education
 - What to expect: common reactions to unusual events
 - Where to get help: information and resources
- Facilitate coping and problem solving
- Distribute materials widely
- Ensure cultural appropriateness

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.45

Triage and Assessment

- Identify individuals who urgently need medical and MH care
 - Refer for follow-up as appropriate
- Conduct needs assessments
 - Safety, security, survival
 - Psychological and social support and available resources
 - Further interventions (depending on impairment)

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.46

Attend to Needs During Triage

- Concern for basic survival
- Grief over loss of loved ones or loss of possessions
- Fear and anxiety about safety
- A need to feel part of the community and recovery efforts
- Problems in living and changes in normal routines

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.47

MH Referrals

Make MH referrals for follow-up as appropriate

- Disoriented: unable to recall past 24 hours, etc.
- Clinically significant symptoms that impair functioning
- Bereaved
- Preexisting psychiatric disorder
- Required medical or surgical attention
- Inability to care for self
- Homicidal or suicidal thoughts or plans
- Problematic use of alcohol or drugs
- Violent behavior (child, elder, or spousal abuse)
- Particularly intense and long exposure
- Isolated and lack social support

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.48

Screening and Assessment Checklist

- Trauma and exposure to loss
- Current psychological and physical distress
- Presence of risk and resiliency factors
- Medical and health conditions
- Prior coping with major stressors, trauma, and loss
- Current living situation
- Availability of social support
- Current priority concerns and needs

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.49

Anger Management

- Stay calm
- Listen seriously and attentively
- Acknowledge and validate feelings
- Identify specific sources of anger
- Focus on problem and its resolution
- Remain respectful
- Follow-up and keep your promises

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.50

Acute Crisis Intervention

- When should you use crisis intervention?
 - When life has been disrupted
 - When coping mechanisms fail
 - When there is evidence of impairment
- Remember: crisis intervention is support, not psychotherapy
- This technique is crisis focused, and prevention and education oriented, not cure oriented

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.51

CISM

- CISM is an integrated “system” of interventions designed to prevent and/or mitigate adverse psychological reactions that often accompany disasters
- It has been used principally to prevent PTSD although the science is not clear

For more information:
<http://www.icsf.org/>

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.52

Components of CISM

- Education
- Individual support
- Group meetings
- Support services for operations personnel and management
- Family support
- Referral
- Follow-up

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.53

The Efficacy of CISM

- CISM is effective
 - Roberts & Everly (2006)—36 crisis intervention studies found that “adults in acute crisis or with trauma symptoms. . . can be helped with intensive crisis intervention and multicomponent CISM”
 - Everly et al. (2002)—8 CISM studies found it efficacious when conducted in a standardized format by trained leaders
- CISD alone may not be effective
 - van Emmerik et al. (2002); Rose, Bisson, & Wessely (2003); Rose et al. (2001)
- CISM is more appropriate as an entire system of care for staff or other homogeneous groups (NIMH, 2002)

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.54

Acute Cognitive Behavioral Therapy (CBT)

- CBT interventions can ameliorate many short-term reactions to disasters
 - Acute stress, PTSD, depression
 - Effective when used immediately after an event
- Survivors can be taught to address their own anxiety disorders
 - Problem solving, deep breathing, and relaxation exercises

SOURCE: Walser et al. (2004); Bryant & Harvey (2000).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.55

Interventions to Address Medium- to Long-Term Reactions

- CBT
- Eye movement desensitization and reprocessing (EMDR)
- Bereavement and grief counseling
- Family therapy for families in crisis

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.56

Evidence-Informed Treatments for Trauma-Related Disorders (PTSD)

- CBT
 - Cognitive restructuring
 - Exposure therapy
- EMDR
- A meta-analysis found that over 50% of patients who complete CBT treatment improve

SOURCES: Bisson & Andrew (2005), Bradley et al. (2005), and Hamblen et al. (2006).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.57

CBT

- Brief, structured, and time-limited form of psychotherapy (typically 8–12 sessions)
 - Identify thoughts associated with feelings and actions (cognitive restructuring)
 - Increase pleasurable activities (behavioral activation)
- Efficacious for adults and children with depression and PTSD
- Adapted for distress following a disaster

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.58

CBT for Post-Disaster Distress (1)

- Developed by Project Liberty (a federally funded crisis counseling program used in 9/11 and Florida hurricanes)
- Intended for those who show more than normal transient stress after a disaster
- Functions as an intermediate step between traditional crisis counseling and longer-term MH treatments
- Designed to be implemented no sooner than 60 days following the disaster

SOURCE: Hamblen et al. (2006).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.59

CBT for Post-Disaster Distress (2)

- Manualized 8–12 session treatment for problems that persist after exposure to disaster
- Incorporates techniques shown to be effective with a range of symptoms commonly seen in disaster survivors
 - Anxiety, depression, fear, phobias, substance abuse, grief, anger
- Three main sections:
 - Psychoeducation
 - Coping skills
 - Cognitive restructuring
- Not intended to treat a specific psychiatric disorder

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.60

EMDR

- Psychotherapeutic approach involving some form of exposure and “trauma processing”
- Effective in reducing substantial and sustained PTSD and depression
 - More successful than pharmacotherapy
 - Primarily for adult-onset trauma survivors
- Given highest-level recommendation by the Veterans Administration for trauma treatment

SOURCE: van der Kolk et al. (2007).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.61

Phases of EMDR Treatment

- Take a history to assess readiness; develop a treatment plan
- Ensure that the client has good coping skills and adequate ways to handle emotional distress
- Identify a vivid visual image as a target
- Ask the client to focus on that image while following an external stimuli
- Ask the client to let go and notice sensations and cognitions to achieve positive sensations
- At closure, ask the patient to keep a journal
- Reevaluate previous progress in the next session

For more information: <http://www.emdr.com>

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.62

Bereavement and Grief Counseling

Counseling and support services may be helpful to those with normal grief reactions

- Guidance through the challenges of grieving and adjustment to the loss
- Delivered by professionals individually or in groups

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.63

Goals of Grief Counseling

- Understanding the natural grief process
- Accepting and adjusting to the reality of the death
- Receiving affirmation for the “normalcy” of feelings
- Receiving information about the grief process and common grief responses
- Understanding common obstacles and how to deal with them
- Identifying and utilizing effective coping strategies

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.64

Approaches to Grief Counseling

- Grief therapy
 - Indicated for complicated grief
 - Identifying and resolving the conflicts of separation that interfere with the normal mourning process; “anniversary” reaction grief
- Bereavement groups
 - Help individuals recognize feelings and put them in perspective
 - Alleviate loneliness; enhance social network
- Specialized groups
 - Widows, parents who have lost a child, family members of suicide survivors

SOURCE: Shear et al. (2005).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.65

Therapy for Families in Crisis

Crisis strains the fabric
of the strongest,
most functional families

Dysfunctional family behaviors can develop
when circumstances that accompany a
disaster unbalance the equilibrium of the
family structure and functioning

SOURCE: Wells (2006); Laudisio (1993).

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.66

Goals of Family Therapy

- Restore healthy family functioning
- Convey how the crisis affects the family
- Identify any sources of stress that existed before the disaster
- Teach the use of problem-solving strategies
- Teach coping skills
- Create equilibrium by restoring communication and reestablishing roles

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.67

Special Populations

- Organizational culture and cultural competency
- Disaster reactions and responses
- ➡ • Special populations
 - Identifying these populations
 - Interacting with them appropriately
- Interactive exercises and discussion

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.68

Special Populations in the Hospital and Clinic Setting

- Among the main groups potentially affected
 - Survivors and their families
 - Nonexposed individuals seeking help
 - Disruptive patients in the ED
 - Hospital inpatients
 - Hospital and clinic staff
- There are also the needs of special populations to consider
 - Persons requiring special assistance
 - Persons with chronic mental illness

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.69

Survivors and Families

- “Population A,” (as shown earlier from DeWolfe) located in
 - EDs
 - Inpatient floors and ICUs
 - Clinics and offices
- Their families, located in
 - Waiting rooms
 - Lobbies
 - Cafeterias
- Families will also present with grief reactions and fears of contamination

SOURCE: DeWolfe (2000).

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

HEALTH

Module 3: Training for County Disaster
Mental Health Staff

3.70

Survivors

- In the acute stage, MH involvement with survivors may be limited by needs of medical/surgical staff to stabilize and treat the patients
- To provide MH support, consider
 - PFA
 - Psychoeducation and reassurance
 - Triage and assessment
 - Referral to specialty MH
 - Crisis intervention
- Survivors may require short-, medium- or long-term follow-up for MH needs

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.71

Families of Victims

- In the acute stage, MH involvement with families will be dictated by triage decisions
- Potential early intervention techniques:
 - PFA
 - Psychoeducation and reassurance
- Triage and assessment
 - Referral to specialty MH
- Crisis intervention
 - Anger management
 - Grief counseling
- Follow-up for medium- to long-term MH needs

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.72

Individuals Not Exposed but Seeking Help

Predicted to be the largest group of persons “surging” into our health care system

Will be in ED, clinics, and stations where triage of survivors occurs; many will continue through system for further evaluation

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

RAND HEALTH

Module 3: Training for County Disaster
Mental Health Staff 3.73

Identifying Nonexposed Help-Seekers

- Medical staff will differentiate individuals who have probably been exposed/infected from those who have psychological reactions
- You should be aware of how the medical staff are making these decisions
- Distinguishing features will differ among agents but may include proximity to event, specific concerns, specific versus nonspecific signs and symptoms *

* Adapted from Kroenke (2006) and Bracha & Burkle (2006).

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

RAND HEALTH

Module 3: Training for County Disaster
Mental Health Staff 3.74

Nonexposed Help-Seekers

- MH staff can evaluate individuals deemed nonexposed for nonmedical problems
- Evaluations should focus on differentiating event-focused versus preexisting concerns and acute versus chronic problems
 - The nature and severity of an individual's concerns
 - Level of coping, resources, social support

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.75

Disruptive Patients in ED

- Give disruptive patients immediate attention, appropriate information, reassurance, or other intervention, then move them out of the treatment area
- Disruption is contagious
- Consider sending disruptive persons to a specially designated team for needed services

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.76

Individuals Requiring Special Assistance

- Individuals include those with physical or developmental disabilities, sensory impairments, the frail elderly, children, etc.
- They are at increased risk of harm from the event
 - Less able to respond to the environment; fewer physical or cognitive resources for recovery
- MH issues may present in atypical ways
 - Consider what materials and experience you have to help traumatized children. Work through trusted caregivers/neighbors for the very old

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.77

Concerns About Persons with Chronic Mental Illness

- Event could exacerbate chronic illness
 - Poor or inadequate coping skills
 - Impaired access to MH care
- In addition to early intervention
 - Assess current symptoms
 - Assess availability and compliance with medication
 - Focus on identifying resources and support
 - Provide early follow-up

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.78

Hospital Inpatients

- Patients who were in the hospital before the event may need to be discharged to make room for the surge of new patients
- Of particular concern are
 - Immunocompromised individuals (cancer, HIV/AIDS)
 - Patients receiving extended workups or prolonged therapies
- Patients may worry about delays in care, family, property, access to health care

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

Module 3: Training for County Disaster
Mental Health Staff 3.79

Addressing the Needs of Hospital Inpatients

- The literature says little about dealing with this group following a disaster
- Triage decisions will dictate how urgently these cases should be seen
- Crisis intervention may be useful
 - Reducing emotional distress and mental stress
 - Facilitating problem-solving skills
 - Advocating for patients with the health care staff

County of Los Angeles
Department
of Mental Health

COUNTY OF LOS ANGELES
Public Health

Module 3: Training for County Disaster
Mental Health Staff 3.80

Supporting Hospital/Clinic Staff

- During a disaster, MH care for hospital and clinical staff emphasizes immediate and practical needs
- MH staff seeing patients should be encouraged to linger to chat with staff; provide simple support and advice, e.g., about self-care
- Staff break areas also offer opportunities to provide MH support

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.81

Group Discussion

- Organizational culture and cultural competency
- Disaster reactions and responses
- Special populations
- ➔ • Interactive exercises and discussion
 - “Break-out” groups
 - Sharing best practices
 - Discussion

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster

3.82

Scenarios We Will Consider

Radiological dispersal device
(RDD)—version A

Radiological dispersal device
(RDD)—version B

Pandemic influenza
(or SARS)—version A

Pandemic influenza
(or SARS)—version B

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.83

Group Process

- You are called to respond to a large-scale disaster, hear a briefing, and are assigned to a hospital or clinic
 - What are you going to do?
 - What are the best practices?
 - Is there any part of the response that you have questions about?
- Select a group leader and a note taker
- Take 15 minutes to answer questions
- Report back to the group

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff 3.84

Across All the Scenarios

Did you consider the different psychological triggers?

- Restricted movement
 - Effect of countermeasures (e.g., isolation, PPE, vaccine)
- Limited resources
 - Enough protective gear/supplies
 - Available staff
- Trauma exposure
 - Visible injuries or images
- Limited information
 - Inefficient, insufficient, conflicting information
- Perceived personal or family risk
 - Exposure to harmful agents, illness, injury, or death

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.85

RDD Scenarios

Did you consider

- Reporting to the facility MH team leader
- Concerns about contamination; no protective gear
- People exposed to gruesome images
- Insufficient information about the risk of cesium exposure
- Alternative staffing to offset staff not reporting to work
- Identifying alternative locations for care
- Providing PFA and other early interventions
- Practicing cultural competency

County of Los Angeles
Department
of Mental Health

Module 3: Training for County Disaster
Mental Health Staff

3.86

Pan-Flu Scenarios

Did you consider

- Reporting to the facility MH team leader
- The implications of isolating those exposed
- MH consequences of limited medical supplies
- Shortage of staff
- How to protect yourself from contagion
- Self-care needs of staff
- Identifying a more quiet area where crisis counseling/MH care can be provided
- Providing PFA and other early interventions
- Practicing cultural competency

County of Los Angeles
Department
of Mental Health
